Note: Kit is designed to fit within an Electra Glide Classic's factory pinstripe areas as shown in product image.

As accurate as H-D tries to be with pinstripe placement, each set is slightly different from each other. Thus, margins between our graphic pieces and factory pinstripes will be different in each area. We encourage placing the pieces to the best of your ability and everything should look fine.

While kit is shown on and designed specific to H-D's '13 Electra Glide Classic, graphics may also be used on other bike fitments such as a Street Glide.

Installation Tip: Dryfitting each piece prior to installation is recommended to become familiar with placement.

Graphic kit is manufactured with Premium Wrapping Cast vinyl product with an Air Release adhesive system. Thus, wet application is not recommended.
